Taiwan Visitor Tracker Exit Profile & Market Segmentation Report

FY2020 – QTR.2 JAN-MAR 2020

[ANTHOLOGY®]
RESEARCH

Background and Methodology

- All surveys were partially interviewer administered. Upon completion of the surveys, Anthology's professional Taiwanese speaking interviewers double-checked each questionnaire for consistency and completeness, while the respondent was present.
- A total of 151 departing Taiwanese visitors were randomly interviewed at the Guam A.B. Wonpat International Airport's departure and waiting areas.
- The margin of error for a sample of 151 is +/- 8.0 percentage points with a 95% confidence level. That is, if all Taiwanese visitors who traveled to Guam in the same time period were asked these questions, we can be 95% certain that their responses would not differ by +/- 8.0 percentage points.

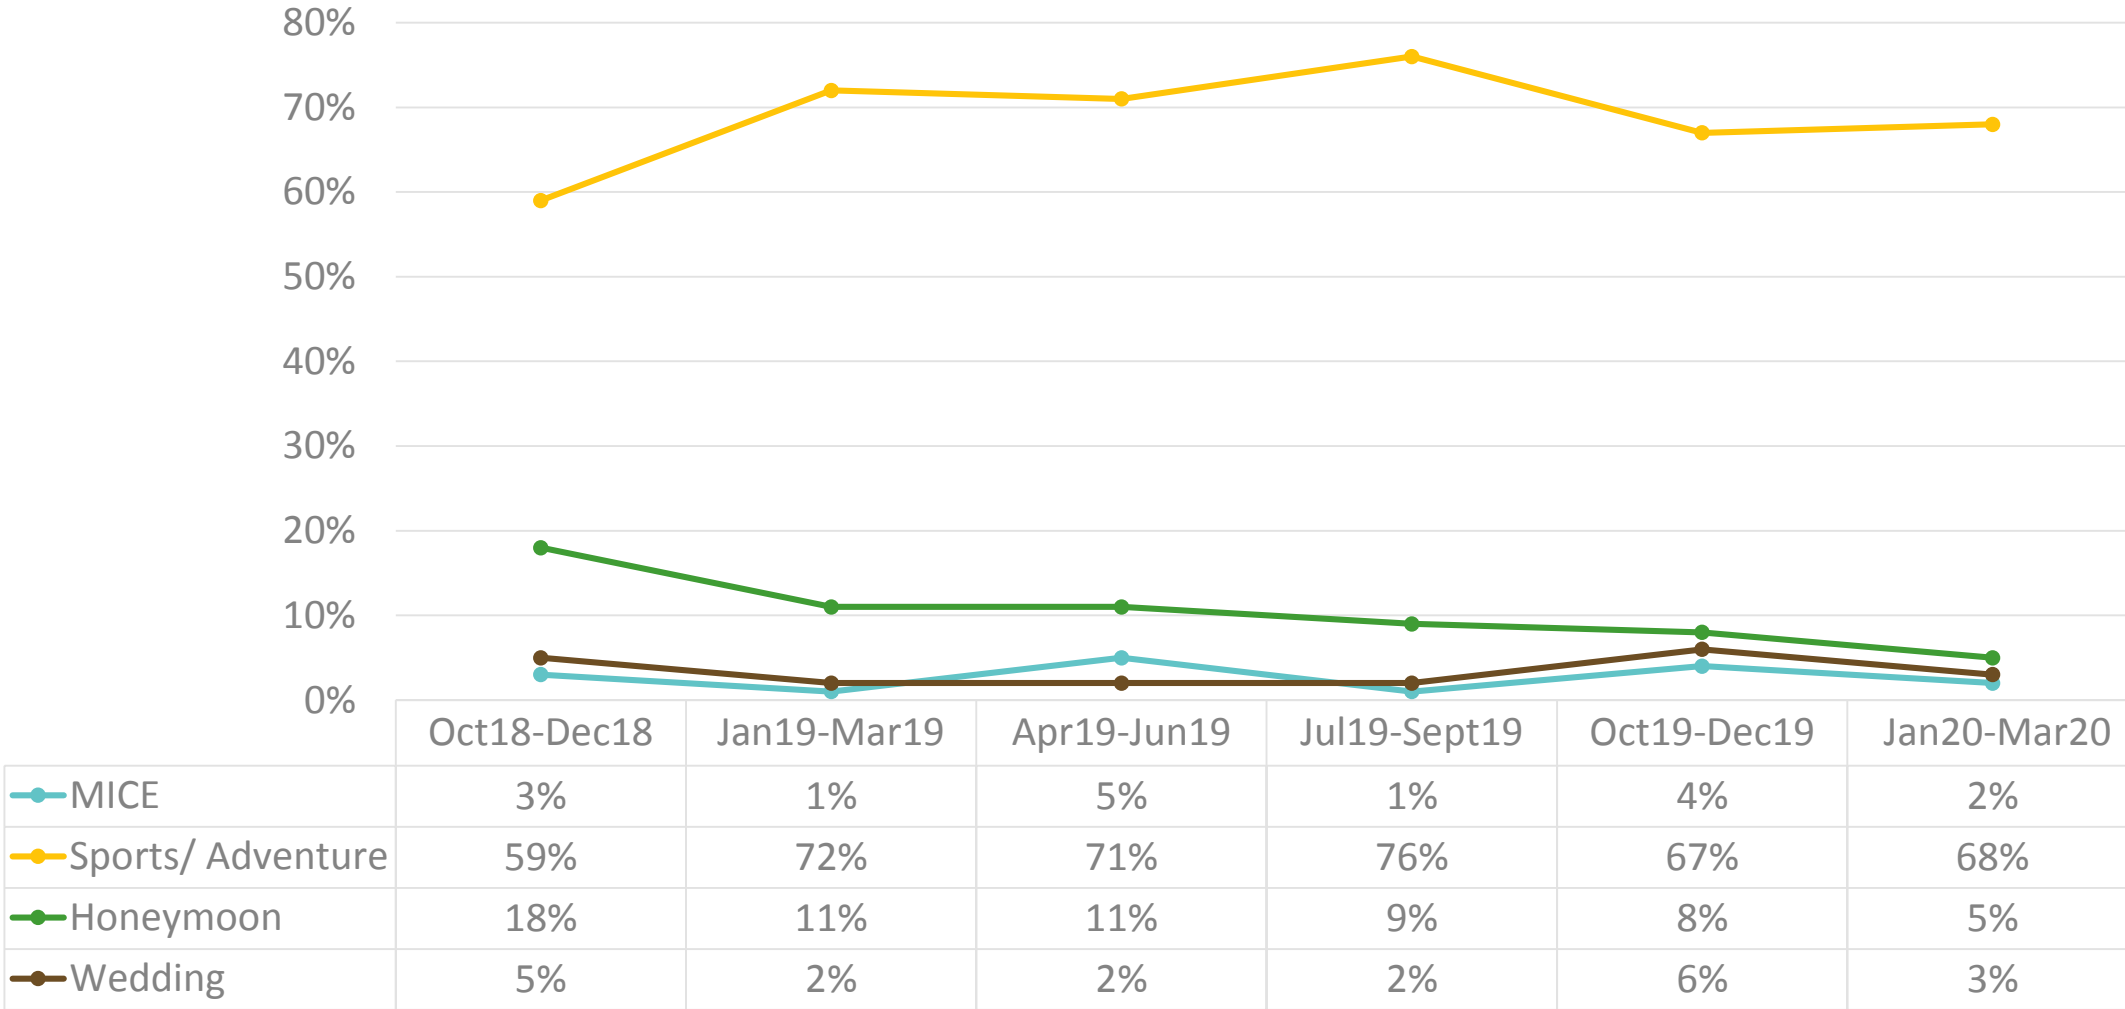

Objectives

- To monitor the effectiveness of the Taiwan seasonal campaigns in attracting Taiwanese visitors, refresh certain baseline data, and to better understand the nature and economic value or impact of each of the targeted segments in the Taiwan marketing plan.
- Identify significant determinants of visitor satisfaction, expenditures and the desire to return to Guam.

Key Highlighted Segments

- The specific objectives were:
 - To determine the relative size and expenditure behavior of the following market segments:
 - MICE (Q8 Convention/ Conference/ Trade Show/ Incentive Trip)
 - Honeymoon (Q8)
 - Wedding (Q8 Get married/ attend wedding)
 - Sport/ Adventure (Q8 Scuba, water sports, organized sporting activity/ event / Q38)
 - To identify the most significant factors affecting overall visitor satisfaction.
 - To identify (for all visitors from Taiwan) the most important determinants of on-island spending.

SECTION 8

ADVANCED STATS

ANALYSIS TECHNIQUE

- Dependent variables: total per person on island expenditure and overall satisfaction (numeric)
- Independent variables are satisfaction with different aspects of trip to Guam (numeric).
- Use of linear stepwise regression to derive predictors (drivers) of on-island expenditure and overall satisfaction, Since both the independent and dependent variables are numeric.
- This determines the significant ($p \leq .05$) drivers and the percentage of the dependent variables accounted for by each significant predictor and by all of them combined.
- The predictor variables (drivers) are ranked on the percentage they account for the dependent variable. The top two ranked independent variables generally account for the largest percentages of the dependent variable and are thus the best predictors (drivers) of the dependent variable.
