Governor Lou Leon Guerrero signed Executive Order No. 2020-32 relative to continuing Stay-at-Home Order. Guam continues to be in PCOR 1. All persons in Guam are directed to continue to stay at home, subject to limited exceptions such as obtaining food and household necessities, going to and from work at authorized businesses, seeking medical care, caring for dependents or pets, caring for a vulnerable person in another location, or for individual exercise.

Most businesses and public accommodations will continue to be closed and prohibited from on-site operations. This prohibition on operations, shall not apply to specifically enumerated businesses as set forth in applicable DPHSS Guidance.

Non-essential retail businesses are permitted to operate, subject to applicable DPHSS Guidance which shall include, at minimum, that customers shall not be permitted to enter the physical premises but shall be permitted to pick up goods outside of the establishment from which they have already placed their orders. Additionally, eating establishments may allow customers to enter their premises for the limited purpose of take-out dining, subject to applicable DPHSS Guidance.

The Guam Election Commission is authorized to conduct In Office Absentee Voting for the 2020 General Election by appointment, effective September 19, 2020/ Prospective voters may contact GEC directly for more information or to schedule an appointment. All in-person voting and related activities are subject to mitigation measures delineated in applicable DPHSS Guidance, including the wearing of masks, social distancing, and frequent disinfection of surfaces.

For the latest information on COVID-19, visit dphss.guam.gov or guamrecovery.com. For inquiries on COVID-19, contact 311 through a local number, or call the Joint Information Center at (671) 478-0208/09/10.
The Department of Public Health and Social Services (DPHSS), in partnership with Office of the Governor and Office of Technology, today unveiled the Guam COVID Alert app, an exposure notification app that has the ability to alert users if they have been exposed to other app users who have been diagnosed with COVID-19. Guam is the first U.S Territory to launch an exposure notification app developed by engineers with Apple, Google, and the PathCheck Foundation uses Bluetooth technology for digital contact tracing.

Guam COVID Alert is based on the PathCheck solution designed to work with Google Apple Exposure Notification (GAEN) application programming interface (API). GAEN uses Bluetooth in iOS and Android mobile phones to securely and confidentially identify when people may have been exposed to COVID-19 through the sharing of random keys that are automatically generated.

This app proactively alerts an individual of an exposure notification, allowing the recipient to be informed and take the necessary steps to self-quarantine, seek medial attention and reduce potential exposure to others over the next 14 days.

Individuals who test positive for COVID-19 will receive an unique randomized code from a DPHSS official which can be entered by the user into the Guam COVID Alert app to verify the positive report. Other app users who may have been in close contact to an individual who reported a positive diagnosis will then get alerted to an exposure notification through the app.

By having a better understanding of who is potentially infected and laying low over the next several weeks, Guam can reduce the rate of transmission between individuals and stop the spread of COVID-19. Digital contact tracing is meant to augment manual contact tracing.

The Guam COVID Alert mobile app is now available for download from the App store and Google Play. For more information, visit Guamcovidalert.guam.gov.
COVID ALERT MOBILE APP

HOW IT WORKS

GUAM COVID ALERT uses Bluetooth Low Energy (BLE) technology to quickly notify users who have likely been exposed so you can reduce the risk of infection for your friends and family and help Guam stop the spread.

STEP 1
Download the free app on iPhone App Store or Android Google Play Store.

STEP 2
Once you opt-in to the notification system, the Exposure Notifications System will generate a privacy-preserving “random key” for your device. To help ensure these privacy-preserving “random keys” can’t be used to identify you or your location, they change every 10–20 minutes.

STEP 3
Your phone and the phones around you will work in the background, without draining your battery or data, to exchange these privacy-preserving random keys via Bluetooth Low Energy (BLE) technology. This is a passive process that begins once you opt-in and functions without the app open.

STEP 4
On a daily basis, your phone downloads a list of all the random keys associated with positive COVID-19 cases and checks them against the list of random keys it has encountered in the last 14 days.

STEP 5
If there’s a match, the app will notify you with further instructions from your public health authority on how to keep you and the people around you safe.
The #UGM Goes Virtual event is in its home stretch this week as Guam Sports Events, Inc. (GSE) and United Airlines remind runners to complete their races and post their results online before midnight on Sunday, Sept. 20.

Last month, the 2020 United Airlines Guam Marathon (UGM) partners announced the extension of race week to two weeks to allow runners more time and flexibility to safely complete their 5K, 10K, half marathon (13.1 miles), and marathon (26.2 miles) races. Run Guam has recommended running routes for all race distances that can be found on UGM’s website, unitedguammarathon.com, in the “Course Descriptions” tab.

After the virtual event was announced, GSE welcomed an additional 251 new registrants from Guam, Japan, Korea, Switzerland, Germany, Dubai, Philippines, Saipan, and Russia. There is a total of 2,715 registrants, representing 15 different countries and from as far away as Switzerland. Almost 200 resident and international runners have already completed their races and logged their times online -- 35 marathon, 65 half marathon, 60 10K, and 34 5k races.

EAT.SHOP.RUN
Registered runners can take advantage of UGM’s runners’ perks program Eat.Shop.Run through Sept. 20. The offers are posted on UGM’s website, unitedguammarathon.com. To receive the offers and discounts, UGM runners should mention the offer when placing their orders at the participating dining and retail outlets and present their proof of registration at the time of pickup.

 PACKET PICKUP
The #UGM2020 packet pickup dates will be announced as soon as the government mandates are lifted. Runners are encouraged to check UGM’s social pages for updates.

OFFICIAL UGM EVENT MERCHANDISE
Official UGM 2020 merchandise is available exclusively through Run Guam’s online store (runguam.com), which offers a special shipping rate for local orders. Run Guam will post updates on its social media pages as to when its Tumon location will be opening for curbside pickup. Run Guam, locally owned and operated, is the official merchandise designer and partner of UGM and is a UGM silver sponsor.

HOW TO LOG RACE TIMES
UGM also reminds runners that they will need to post their race results to their virtual race pages on Athlinks by following these instructions:

All participants should have received an Athlinks Virtual Race email that links to their unique Time Input page. Once they’ve entered a time, runners can claim their results on their Athlinks profile.

Participants can then search for their names on their Event Results Page to claim their Virtual Race Page, which will require them to join or sign in to their Athlinks account to post the results there.

Race organizers also noted that event times are submitted at the participants’ discretion and are unverified. Accordingly, the virtual event results will not be used for official timekeeping purposes.
The Guam Department of Labor (DOL) is hiring 24 individuals to assist the Department of Public Health and Social Services (DPHSS) with data collection and data entry. Funded by the National Dislocated Worker Grant, the program is seeking individuals who have been laid off or furloughed from their jobs as a direct result of COVID-19. The department is recruiting 12 data control clerks and 12 community program aides for 6-month terms. Both positions pay $10.14 an hour.

**Primary duties for the data control clerk includes:**
- Assisting the contact tracing team with data entry information gathered from the field and through investigations.
- Retrieving data and data verification.

**Primary duties for the community aides include:**
- Assisting program staff with disease surveillance activities and epidemiological investigations of contacts.
- Assisting in outreach programs.

**Eligibility:**
Priority is given to individuals who meet the criteria below:
- Laid off as a result of quarantine, because they miss work to care for a family member, or because they cannot come to their regular workplace in order to follow social distancing requirements; and
- Workers laid off after a business closure related to disruptions caused by the outbreak and the efforts to contain it.
- A self-employed individual who became unemployed or significantly under-employed as a result of the disaster or emergency.

**To Apply:**
Register on hireguam.com and upload your resume. Then send an email to ndwg.hiring@dol.guam.gov with your full name, contact information and the position you are interested.

**SOCIAL DISTANCING LEVEL**

Level 2: Nationwide until September 20

Level 2.5: Seoul Metropolitan Area until September 13

*From September 14, Seoul Metropolitan Area is now under Level 2*

**SKILL FAMILY GATHERINGS THIS CHUSEOK**

It is best to stay home this year for Chuseok, health officials said, warning that the yearly mass migration of people around the country for family events during the national holiday could spark new COVID-19 outbreaks. Ahead of the six-day national holiday slated for Sept. 30-Oct. 4, the Health Ministry said it would limit sales of tickets for the KTX trains and enforce physical distancing at motorway service stations.

“Tens of thousands of people traveling at the same time can prompt nationwide transmissions and give rise to significant outbreaks,” Son Young-rae, spokesperson for Ministry of Health and Welfare, said in a news briefing. “To protect vulnerable family members, staying home is strongly recommended this fall.”

FOREIGN MINISTER REITERATES TAIWAN’S READINESS TO HELP VIRUS-STRICKEN NATIONS

Foreign Minister Joseph Wu has written that it will take a mutual effort among members of the international community to recover from the coronavirus pandemic and that Taiwan is ready to contribute.

Wu emphasized that Taiwan’s successful coronavirus response was largely a result of establishing its Central Epidemic Command Center (CECC) and advance preparations.

TAIWAN HAS KEPT ITS FIVE-MONTH STREAK OF NO LOCAL COVID-19 TRANSMISSIONS

Every positive COVID-19 case recorded since April 12 has been either imported – from a person traveling from abroad who tested positive during a mandatory 14-day quarantine – or from a cluster aboard a navy ship returning from a goodwill trip to Palau.

TAIWAN SEES LOWEST ECONOMIC IMPACT FROM CORONAVIRUS IN WORLD

Taiwan proves protecting public against coronavirus actually ensures stronger economy

Confirmed COVID-19 CASES: 503
4% active (18)
Taiwan will sign an agreement with the COVAX global vaccine alliance to ensure a supply of vaccines. CECC Chief Chen expressed that while Taiwanese scientists would continue to develop vaccines of their own, it was important for the country to have access to a fair supply of vaccines internationally.

Taiwan’s top envoy to France shared the nation’s experience at containing the COVID-19 pandemic, in the first ever speech by a Taiwanese envoy at the French Senate.

According to François Wu (吳志中), Taiwan’s top envoy, the following measures helped Taiwan prevent the spread:

- Mutual trust between the Taiwanese people and its government
- Ability of the private and public sectors to stay vigilant
- Nation’s experience in fighting the 2003 SARS outbreak and its early epidemic response measures
- Central Epidemic Command Center (CECC) regularly informs its people and maintains a strong sense of trust between authorities and the public by being highly transparent and efficient
- Nation’s ability to make good use of technology in tracking the phones of people in home quarantine, in tracing all contacts of confirmed patients, and in boosting its daily surgical face mask output
Peach Aviation to resume Taiwan-Japan flights in October

Low-risk countries/regions:
New Zealand, Macao, Palau, Fiji, Brunei, Thailand, Mongolia, Bhutan, Laos, Cambodia, Sri Lanka, Nauru, East Timor, Mauritius, Vietnam

Medium-risk countries/regions:
Malaysia, Singapore, Myanmar, Hong Kong

The CECC updated its list of countries/regions eligible for shortened quarantine periods in Taiwan.
