Background and Methodology

- All surveys were partially interviewer administered, as well as self-administered. Upon completion of the surveys, Anthology's professional Japanese speaking interviewers double-checked each questionnaire for consistency and completeness, while the respondent is present.
- A total of **353** departing Japan visitors were randomly interviewed at the Guam A.B. Wonpat International Airport's departure and waiting areas.
- The margin of error for a sample of **353** is +/- 5.23 percentage points with a 95% confidence level. That is, if all Japan visitors who traveled to Guam in the same time period were asked these questions, we can be 95% certain that their responses would not differ by +/- 5.23 percentage points.

Objectives

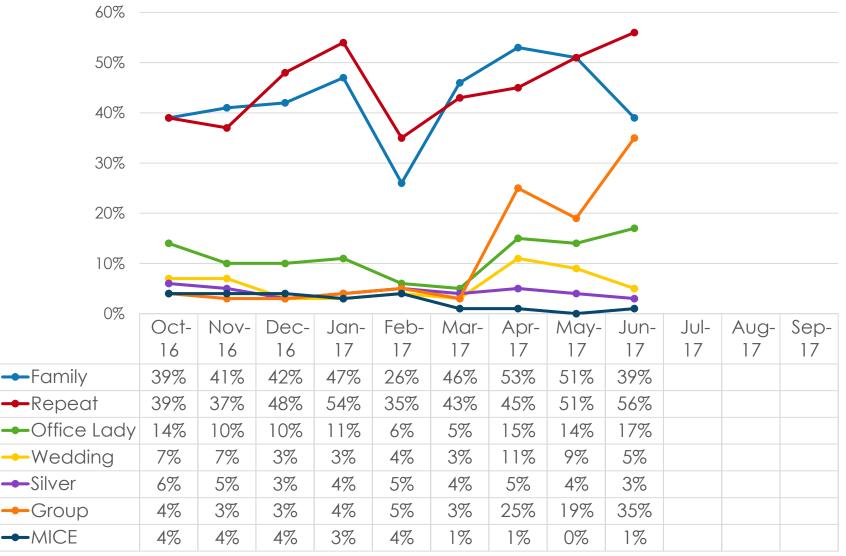

- To monitor the effectiveness of the Japan seasonal campaigns in attracting Japan visitors, refresh certain baseline data, to better understand the nature, and economic value or impact of each of the targeted segments in the Japan marketing plan.
- Identify significant determinants of visitor satisfaction, expenditures and the desire to return to Guam.
