

GUAM VISITORS BUREAU

Korean Visitor Tracker Exit Profile

FY2016

NOVEMBER 2015

Prepared by: QMark Research

Information contained herein is the property of the Guam Visitors Bureau.

The use of this information, in part or in whole, shall require written permission from the Guam Visitors Bureau.

Background & Methodology

- All surveys were partially interviewer administered, as well as self-administered. Upon completion of the surveys, QMark's professional Japanese speaking interviewers double-checked each questionnaire for consistency and completeness, while the respondent is present.
- A total of **365** departing Korean visitors were randomly interviewed at the Guam A.B. Wonpat International Airport's departure and waiting areas.
- The margin of error for a sample of **365** is +/- 5.1 percentage points with a 95% confidence level. That is, if all Korean visitors who traveled to Guam in the same time period were asked these questions, we can be 95% certain that their responses would not differ by +/- 5.1 percentage points.

OBJECTIVES

- To monitor the effectiveness of the Korean seasonal campaigns in attracting Korean visitors, refresh certain baseline data, to better understand the nature, and economic value or impact of each of the targeted segments in the Korea marketing plan.
- Identify significant determinants of visitor satisfaction, expenditures and the desire to return to Guam.

SECTION 1 **PROFILE OF RESPONDENTS**

Marital Status - Overall

- Majority of Korean visitors are married.

MARITAL STATUS

Age - Overall

- The average age of the respondents is 34.93 years of age.

AVERAGE - AGE

Personal Income

Personal Income – 1st time vs. repeat
